To Watch and Listen

Watching and listening particularly can be great ways to absorb information in group oriented environments. It is super important to engage with information this way as it can open up much needed dialogue between friends, family and others.

Climate Justice means Racial Justice.

Climate Injustice means Racial Injustice.

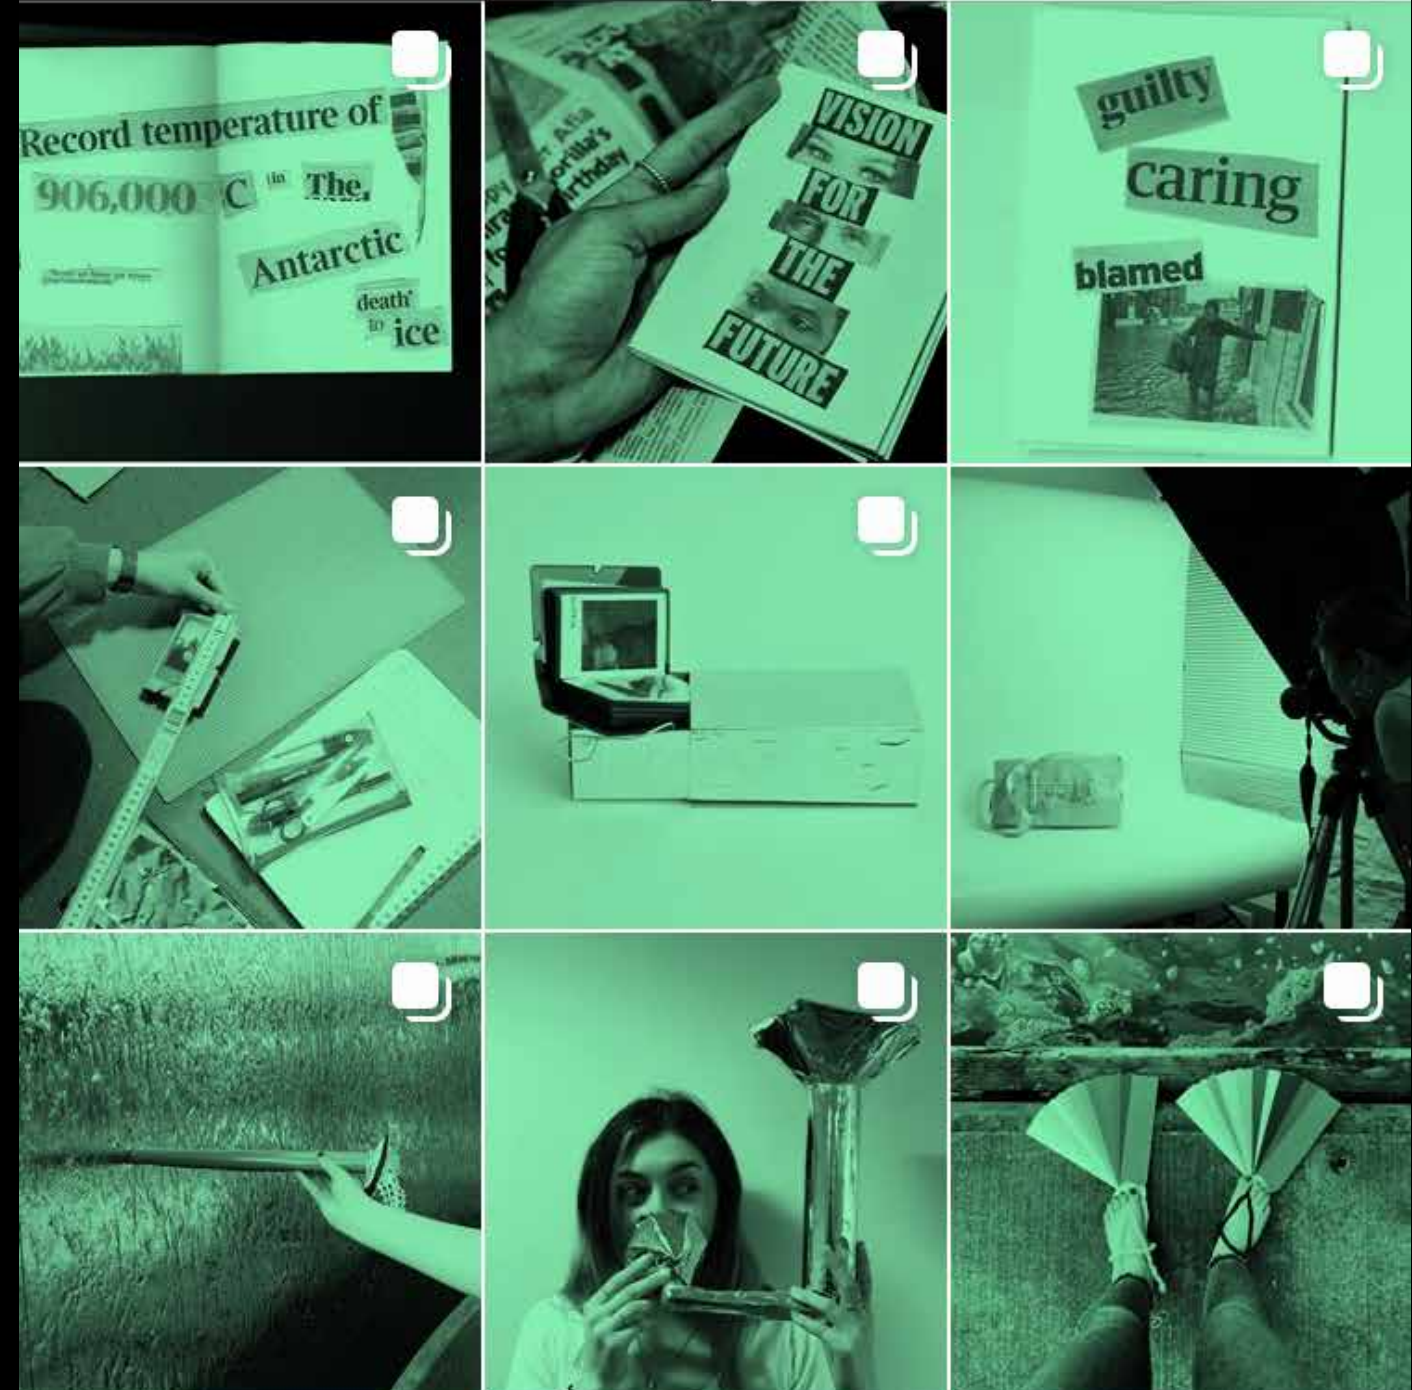

Short Reads

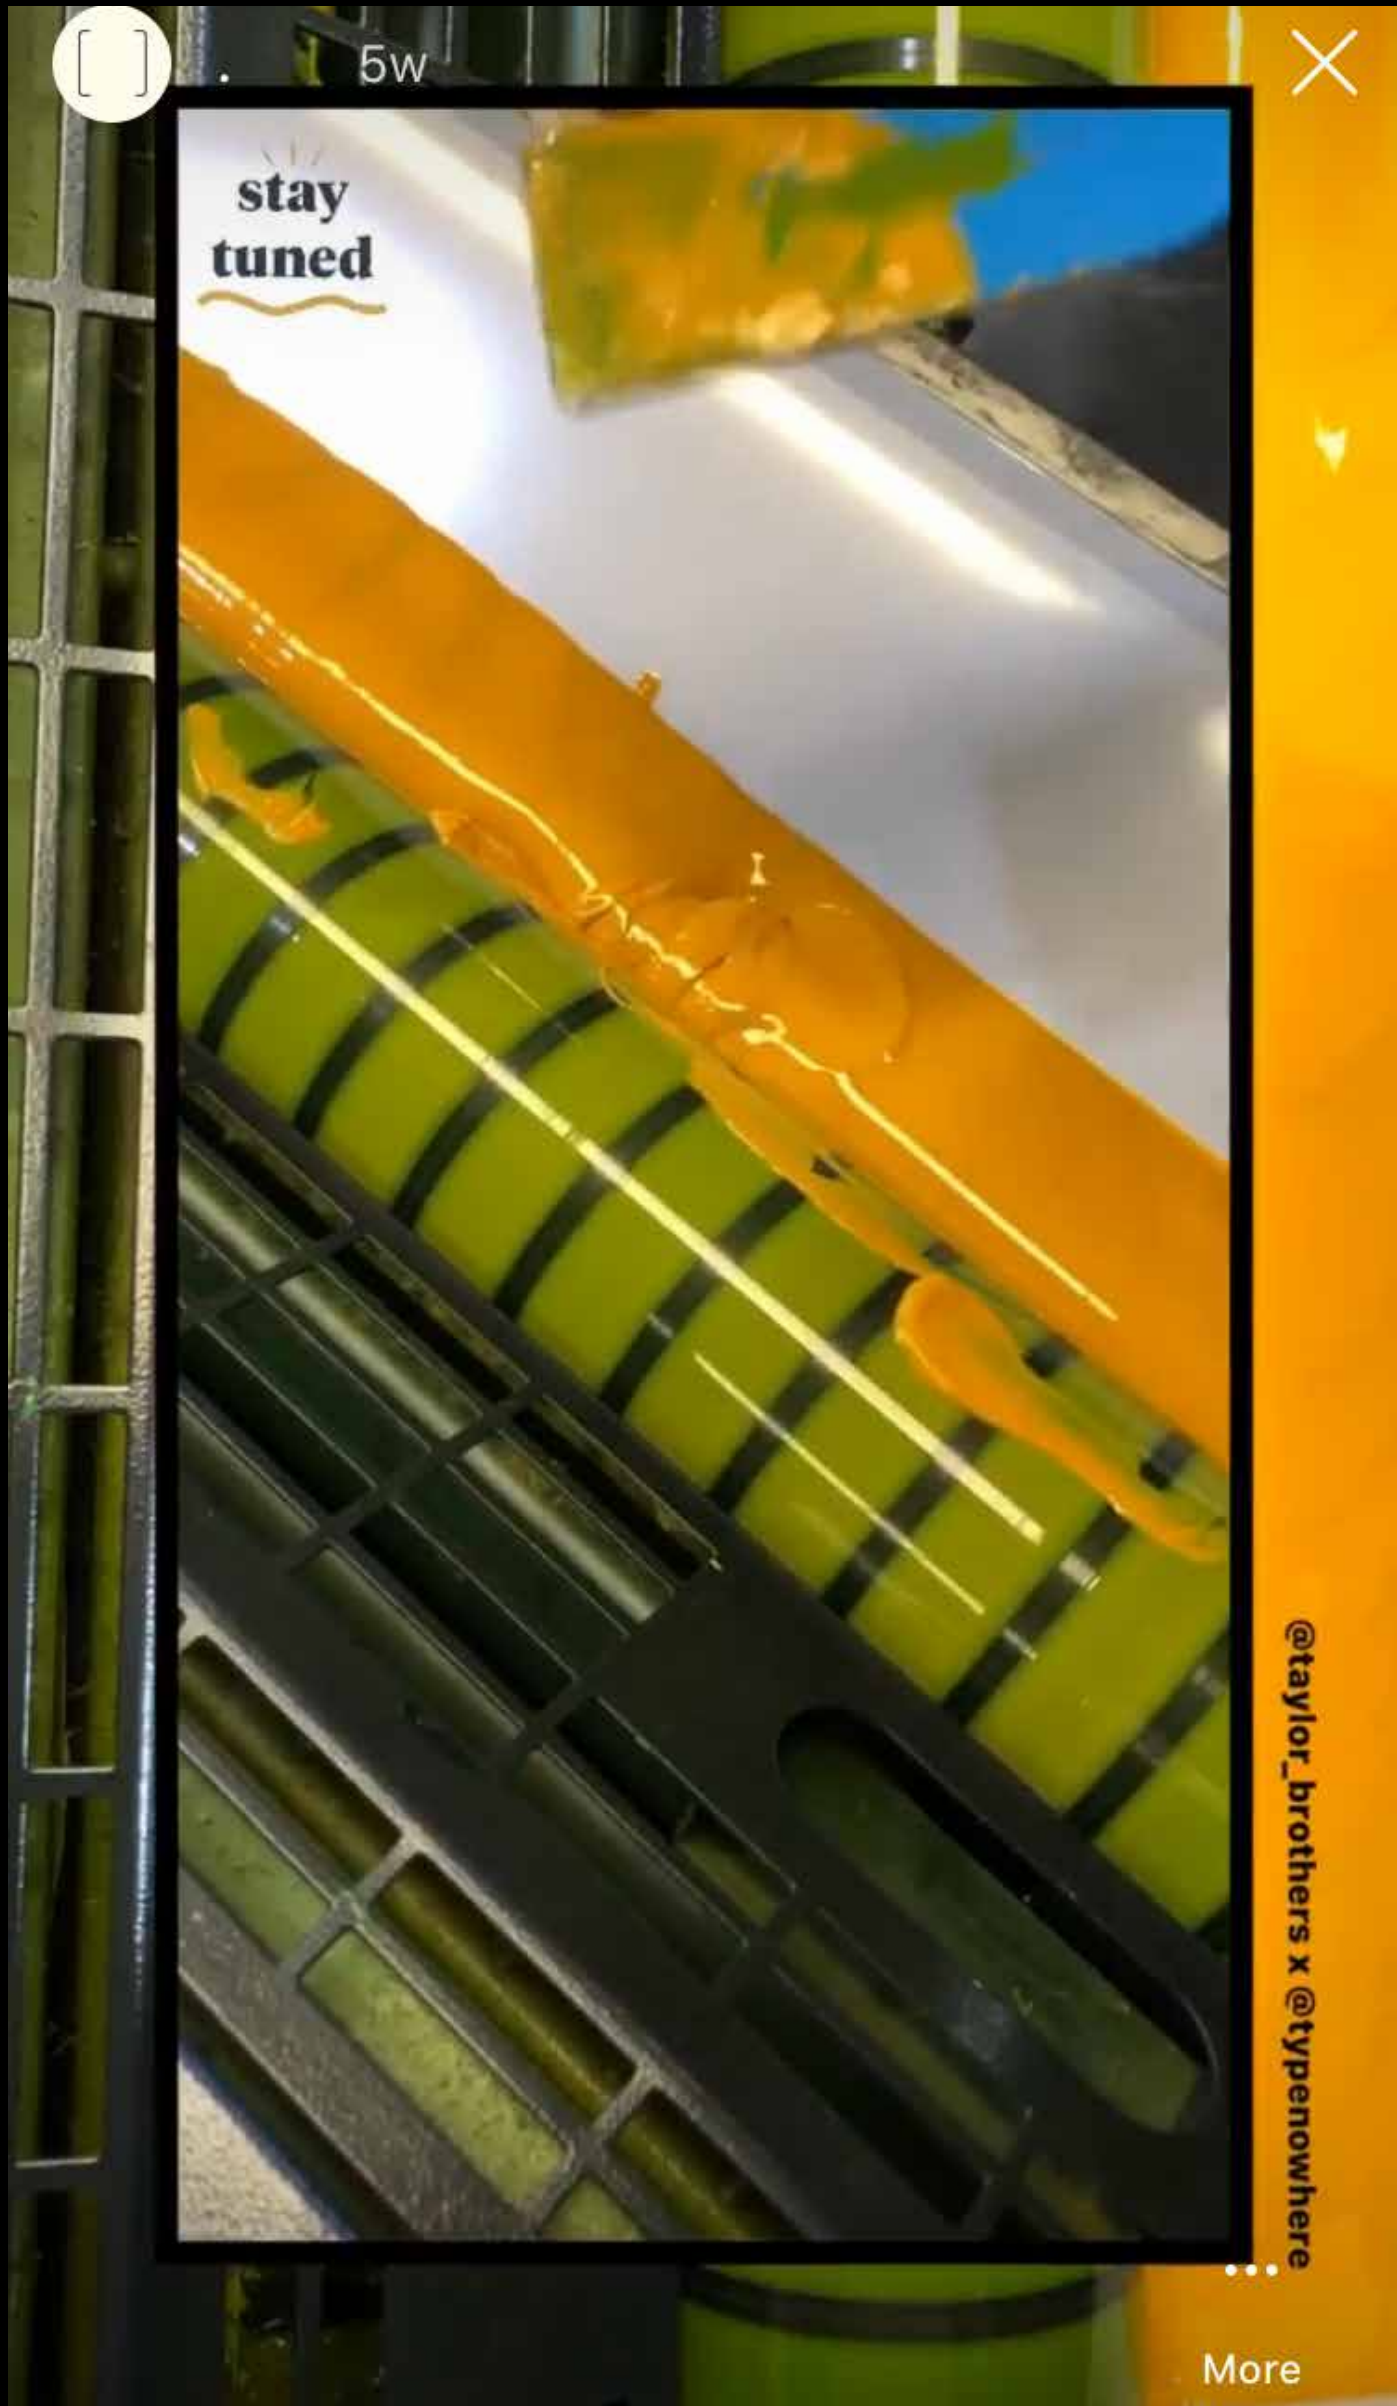

Journalism is a vital way to keep up-to-date and informed on the current climate injustices we face around the globe.

When you're reading an article, try to take note of who the journalist is and who they are writing for. Mainstream media news cycles will shift quickly, so this is a great way to keep track of the right journalists to follow for future reporting!
