THE BRIDGES BETWEEN US IN LONG DISTANCE

8 HOURS DIFFERENCE

Time: Within the eight-hour difference, each shared moment felt briefly suspended, creating short overlaps in time that helped maintain our connection across the distance.

7,000 MILES APART

Distance: A span of 7,000 miles lies between us, crossed by one ticket every two years. Each meeting briefly closes the gap before the distance settles back into place.

70% MESSAGES

30% CALLS

Communication: Over fifty messages and three or more calls each week act as tensioned cables, keeping the connection steady across the span.

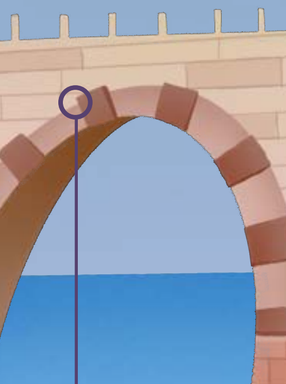

1-3 HOURS SHARED

Routines: Daily, we exist in parallel cycles, one waking as the other sleeps, connected by a narrow beam of shared screen time.

5 MILESTONES: 2 GIFTS, 3 ANNIVERSARIES

Symbolics: Two gifts and three anniversaries form five fixed points, each arching across the distance to hold the bond in place.

- JOY - 25%
- LONELINESS - 25%
- FRUSTRATION - 20%
- TIREDNESS - 20%
- COMFORT - 10%

Emotion: An uneven emotional load strains a frayed rope bridge, holding, but never stable.
